PROJECTS

Weather Forecasting App- [GitHub](#) , [LIVE](#)

- Designed and developed a dynamic Weather Forecasting App using HTML, CSS, and JavaScript, leveraging a third-party API for real-time weather data.
- Integrated a RESTful API (e.g., OpenWeatherMap API) to fetch and display accurate weather data, including temperature, humidity, wind speed, and atmospheric pressure.
- Enhanced app performance by optimizing API requests and caching mechanisms to minimize load times.
- **Tech stack used:** HTML5, CSS3 for frontend development
JavaScript for client-side scripting
Integration with OpenWeatherMap API for real-time weather data.

E-commerce Website- [GitHub](#) , [LIVE](#)

- Led the development of a feature-rich E-commerce Website using HTML, CSS, and JavaScript to create a seamless online shopping experience.
- **Tech stack used:** HTML5, CSS3 for frontend development
JavaScript for client-side interactivity
Integration with third-party APIs for payment processing
User authentication and authorization mechanisms
